SUMMARY

CSE student with hands-on experience building production-grade distributed systems, workflow engines, and web platforms. Proven ability to contribute to large codebases through open source work on Chromium and D. Seeking a software engineering role to apply full-stack and systems expertise to real-world engineering challenges.

PROJECTS

- Weezy: Workflow Orchestration System** (*Express, GraphQL, BullMQ, Redis, PostgreSQL*) Github
- Architected a **DAG-based workflow engine** with deterministic execution and queue-driven processing using **BullMQ + Redis**, supporting **horizontal scalability**.
 - Built GraphQL API layer over PostgreSQL via Prisma, supporting workflow monitoring and user activity tracking across **distributed systems**.
 - Designed **modular** node architecture with clear separation between orchestration and execution layers, enabling extensible third-party integrations.
- Szare: Local File Sharing App** (*Gin, Next.js*) Github
- Engineered Go-based concurrent transfer engine supporting **50+ parallel file streams with zero-copy I/O**, achieving **100+ MB/s throughput** on LAN.
 - Built self-hosted architecture with responsive UI enabling **1–10 GB file uploads per session** with resumable transfer support.
- DevIDE: Online Code Editor** (*Next.js, Convex*) Github
- Integrated **Stripe payment flow** and Redis caching, improving project retrieval performance by **60%**.
 - Designed user profile system storing **10k+ code execution logs** with complete history tracking.

EXPERIENCE

- Open Source Contributor – Chromium** (C++, TypeScript, Java, CSS)
- Refactored Android install flow by extracting WebAPK, Add-to-Homescreen, and Universal Install handling from ChromeActivity into a new AppInstallMenuHandler module improving modularity and maintainability. CL #7458172
 - Replaced deprecated `base::Time` sentinel with `base::Time::Max()` for clearer and safer time-range handling. CL #7206813
 - Improved unreadable console output selection text color in DevTools by enhancing selection contrast for dark backgrounds. CL #7109459
- Open Source Contributor – DUB (D Package Manager) (D)**
- Auto-create missing `workingDirectory` before `dub run` execution. PR #3097
 - Fixed VisualD generator to use the selected compiler instead of hardcoded `dmd`. PR #3094
 - Corrected `ReaderException` to report actual YAML line and column. PR #3100

TECHNICAL SKILLS

- **Languages:** TypeScript, C++, Go, Rust, Python, C, D, Java, Bash
- **Frameworks and Libraries:** React.js, React Native, Next.js, Express.js, Gin, FastAPI
- **Databases and ORMs:** PostgreSQL, MongoDB, Redis, SQLite, Prisma, Drizzle
- **Tools and Technologies:** Linux, Docker, Kubernetes, REST, GraphQL, Git, AWS, Azure, CI/CD

EDUCATION

CV Raman Global University Bhubaneswar, India
Bachelor of Technology in Computer Science and Engineering (2023 – 2027) — CGPA: 8.47
