SUMMARY

CSE student (2027) with hands-on experience in distributed systems, workflow engines, and web platforms. Strong DSA foundation with 500+ LeetCode problems solved. Open source contributor to Chromium and DUB.

OPEN SOURCE EXPERIENCE

Open Source Contributor – Chromium (C++, TypeScript, Java, CSS)

- Refactored Android install flow by extracting WebAPK, Add-to-Homescreen, and Universal Install handling from `ChromeActivity` into a new `AppInstallMenuHandler` module improving modularity and maintainability. CL #7458172
- Replaced deprecated `base::Time` sentinel with `base::Time::Max()` for clearer and safer time-range handling. CL #7206813
- Improved unreadable console output selection text color in DevTools by enhancing selection contrast for dark backgrounds. CL #7109459

Open Source Contributor – DUB (D Package Manager) (D)

- Auto-create missing `workingDirectory` before `dub run` execution. PR #3097
- Fixed VisualD generator to use the selected compiler instead of hardcoded `dmd`. PR #3094
- Corrected `ReaderException` to report actual YAML line and column. PR #3100

PROJECTS

Weezy: Workflow Orchestration System (*Express, GraphQL, BullMQ, Redis, PostgreSQL*)

Github

- Architected a **DAG-based workflow engine** using topological ordering with deterministic execution and queue-driven processing via **BullMQ + Redis**, supporting **horizontal scalability**.
- Designed **modular** node architecture with clear separation between orchestration and execution layers, built GraphQL API over PostgreSQL via Prisma for workflow monitoring across **distributed systems**.

Szare: Local File Sharing App (*Gin, Next.js*)

Github

- Engineered Go-based concurrent transfer engine supporting **50+ parallel file streams with zero-copy I/O**, achieving **100+ MB/s throughput** on LAN.
- Built responsive UI enabling **1–10 GB file uploads per session** with resumable transfer support.

Titly: URL Shortener (*Gin, SvelteKit, Redis, Docker*)

Github

- Implemented **Redis LRU cache reducing database hits by 70%**, enabling sub-5 ms short-code resolution latency.
- Containerized services using Docker, cutting setup time from **30 min to under 3 min** per deployment.

TECHNICAL SKILLS

- **Languages:** C++, Go, Rust, Python, TypeScript, C, D, Java, Bash
- **Frameworks and Libraries:** React.js, React Native, Next.js, SvelteKit, Express.js, Gin, FastAPI
- **Tools and Technologies:** SQL, NoSQL, Linux, Git, Docker, Kubernetes, GraphQL, AWS, CI/CD
- **Concepts:** Data Structures and Algorithms, Distributed Systems, OOP, System Design

ACHIEVEMENTS

- Solved **500+** problems on LeetCode across various topics.
- Knight at LeetCode with a highest contest rating of **1950+**.

EDUCATION

CV Raman Global University

Bachelor of Technology in Computer Science and Engineering

Bhubaneswar, India

(2023 – 2027) — CGPA: 8.47
