SUMMARY

CSE student with hands-on experience building efficient backends, scalable infrastructure, and systems-level software across multiple languages. Contributor to large-scale open-source projects (Chromium, DUB). Seeking a software engineering role to apply algorithms, data structures, and software design principles to solve real world problems.

TECHNICAL SKILLS

- **Languages:** C#, C++, Python, Rust, TypeScript
- **Frameworks and Libraries:** React.js, React Native, Next.js, Express.js, Angular.js, Gin
- **Databases and ORMs:** MySQL, PostgreSQL, MongoDB, Redis, SQLite, Prisma
- **Tools:** Linux, Docker, Git, AWS, GCP
- **Concepts:** System Design, Microservices, Design Pattern, CI/CD, OOP

PROJECTS

- Weezy: Workflow Orchestration System** (*TypeScript, GraphQL, BullMQ, Redis, PostgreSQL*) Github
- Architected a **DAG-based distributed workflow engine** with deterministic execution using BullMQ + Redis, supporting **horizontal scalability** across concurrent workers.
 - Built **GraphQL API** over PostgreSQL via Prisma for real-time workflow monitoring and distributed user activity tracking.
 - Designed modular node architecture with clean separation between orchestration and execution layers, enabling extensible third-party integrations.
- RateLimiter** (*Rust, Actix-web*) Github
- Designed and implemented a **trait-based, extensible rate-limiting service** in Rust using Actix-web, supporting **Token Bucket, Leaky Bucket, Fixed Window, Sliding Window Log, and Sliding Window Counter** through a unified RateLimiter interface.
 - Benchmarked **100K requests** under simulated burst traffic across all five algorithms, achieving **sub-130ms** total execution time while using Mutex-protected shared state for thread-safe concurrent request handling.
- DevIDE: Online Code Editor** (*Next.js, Convex*) Github
- Built customizable multi-theme UI and integrated **Stripe payment flow**, processing **100+ test transactions**.
 - Implemented indexed search and Redis caching, improving project retrieval performance by **60%**.
 - Designed user profile system storing **10k+ code execution logs** with complete history tracking.

ACHIEVEMENTS

- Secured **4th position** at the **D3 National Level Hackathon** organized by **IIIT Bhubaneswar**.
- Solved **550+** problems on LeetCode across various topics.
- Knight at LeetCode with contest rating of **1950+**.

EDUCATION

CV Raman Global University
Bachelor of Technology in Computer Science and Engineering

Bhubaneswar, India
(2023 – 2027) — CGPA: 8.62
