SUMMARY

CSE student with hands-on experience building production-grade distributed systems, workflow engines, and web platforms. Proven ability to contribute to large codebases through open source work on Chromium and DUB. Seeking a software engineering role focused on cloud infrastructure and scalable systems.

EXPERIENCE

Open Source Contributor – Chromium (C++, TypeScript, Java, CSS)

- Refactored Android install flow by extracting WebAPK, Add-to-Homescreen, and Universal Install handling from ChromeActivity into AppInstallMenuHandler, improving modularity. CL #7458172
- Replaced deprecated `base::Time` sentinel with `base::Time::Max()` for clearer and safer time-range handling. CL #7206813
- Improved unreadable console output selection text color in DevTools by enhancing selection contrast for dark backgrounds. CL #7109459

Open Source Contributor – DUB (D Package Manager) (D)

- Auto-create missing `workingDirectory` before `dub run` execution. PR #3097
- Fixed VisualD generator to use the selected compiler instead of hardcoded `dmd`. PR #3094
- Corrected `ReaderException` to report actual YAML line and column. PR #3100

PROJECTS

Weezy: Workflow Orchestration System (Express, GraphQL, BullMQ, Redis, PostgreSQL)

Github

- Architected a **DAG-based workflow engine** with deterministic execution and queue-driven processing using **BullMQ + Redis**, supporting **horizontal scalability** and fault-tolerant distributed task orchestration.
- Built GraphQL API layer over **PostgreSQL** (relational database) via Prisma, enabling workflow monitoring and user activity tracking across distributed systems.
- Designed **modular** node architecture with clear separation between orchestration and execution layers, enabling extensible third-party integrations.

Szare: Local File Sharing App (Gin, Next.js)

Github

- Engineered Go-based concurrent transfer engine supporting **50+ parallel file streams with zero-copy I/O**, achieving **100+ MB/s throughput** on LAN within a self-hosted distributed architecture.
- Built self-hosted architecture with responsive UI enabling **1–10 GB file uploads per session** with resumable transfer support.

DevIDE: Online Code Editor (Next.js, Convex)

Github

- Integrated **Stripe payment flow** and Redis caching, improving project retrieval performance by **60%**.
- Designed user profile system storing **10k+ code execution logs** with complete history tracking.

TECHNICAL SKILLS

- **Languages:** C++, Python, TypeScript, Java, Go, Rust, C, D, Bash
- **Frameworks and Libraries:** React.js, React Native, Next.js, Express.js, Gin, FastAPI
- **Databases and ORMs:** PostgreSQL, MongoDB, Redis, SQLite, Prisma, Drizzle
- **Tools and Technologies:** Linux, Docker, Kubernetes, REST, GraphQL, Git, AWS, CI/CD, Agile

ACHIEVEMENTS

- Solved **500+** problems on LeetCode across various topics with contest rating of **1950+**.

EDUCATION

CV Raman Global University

Bachelor of Technology in Computer Science and Engineering

Bhubaneswar, India

(2023 – 2027) — CGPA: 8.47
