SUMMARY

CSE student with hands-on experience building efficient backends, scalable infrastructure, and systems-level software across multiple languages. Contributor to large-scale open-source projects (Chromium, DUB). Seeking a software engineering role to apply algorithms, data structures, and software design principles to solve real world problems.

TECHNICAL SKILLS

- **Languages:** C++, Python, Rust, TypeScript, Go, C
- **Frameworks and Libraries:** React.js, React Native, Next.js, Express.js, Gin, FastAPI
- **Databases and ORMs:** PostgreSQL, MongoDB, Redis, SQLite, Prisma, Drizzle
- **Tools:** Linux, Docker, Kubernetes, Git, AWS, GCP, gRPC, REST
- **Concepts:** System Design, Concurrency, Multi-threading, CI/CD, OOP, Agile/Scrum

PROJECTS

- Weezy: Workflow Orchestration System** (*TypeScript, GraphQL, BullMQ, Redis, PostgreSQL*) Github
- Architected a **DAG-based distributed workflow engine** with deterministic execution using BullMQ + Redis, supporting **horizontal scalability** across concurrent workers.
 - Built **GraphQL API** over PostgreSQL via Prisma for real-time workflow monitoring and distributed user activity tracking.
 - Designed modular node architecture with clean separation between orchestration and execution layers, enabling extensible third-party integrations.
- Ratelimiter** (*Rust, Actix-web*) Github
- Built a **trait-based, pluggable rate limiting service** in Rust (Actix-web) implementing 5 algorithms — Token Bucket, Leaky Bucket, Fixed Window, Sliding Window Log, and Sliding Window Counter — behind a unified RateLimiter trait.
 - Benchmarked **100k requests** across all algorithms with simulated burst traffic; achieved **sub-130ms** total runtime with Mutex-guarded shared state for thread-safe concurrent access.
- Szare: Local File Sharing App** (*Gin, Next.js*) Github
- Engineered Go-based concurrent transfer engine supporting **50+ parallel file streams with zero-copy I/O**, achieving **100+ MB/s throughput** on LAN.
 - Designed **self-hosted architecture eliminating third-party dependencies**, reducing external attack surface by **100%**.
 - Built responsive UI enabling **1–10 GB file uploads per session** with resumable transfer support.

ACHIEVEMENTS

- Solved **550+** problems on LeetCode across various topics.
- Knight at LeetCode with contest rating of **1950+**.

EDUCATION

CV Raman Global University
Bachelor of Technology in Computer Science and Engineering

Bhubaneswar, India
(2023 – 2027) — CGPA: 8.64
