SUMMARY

CSE student with hands-on experience building distributed systems, concurrent backends, and scalable infrastructure. Contributor to large-scale open-source projects (Chromium, DUB). Seeking a software engineering internship to apply systems knowledge to real-world, high-impact challenges.

EXPERIENCE

Open Source Contributor – Chromium (C++, TypeScript, Java, CSS)

- Refactored Android install flow by extracting WebAPK, Add-to-Homescreen, and Universal Install handling from `ChromeActivity` into a new `AppInstallMenuHandler` module improving modularity and maintainability. CL #7458172
- Replaced deprecated `base::Time` sentinel with `base::Time::Max()` for clearer and safer time-range handling. CL #7206813
- Improved unreadable console output selection text color in DevTools by enhancing selection contrast for dark backgrounds. CL #7109459

Open Source Contributor – DUB (D Package Manager) (D)

- Auto-create missing `workingDirectory` before `dub run` execution. PR #3097
- Fixed VisualD generator to use the selected compiler instead of hardcoded `dmd`. PR #3094
- Corrected `ReaderException` to report actual YAML line and column. PR #3100

PROJECTS

Weezy: Workflow Orchestration System (TypeScript, GraphQL, BullMQ, Redis, PostgreSQL)

Github

- Architected a **DAG-based distributed workflow engine** with deterministic execution using BullMQ + Redis, supporting **horizontal scalability** across concurrent workers.
- Built **GraphQL API** over PostgreSQL via Prisma for real-time workflow monitoring and distributed user activity tracking.
- Designed modular node architecture with clean separation between orchestration and execution layers, enabling extensible third-party integrations.

Titly: URL Shortener (Gin, SvelteKit, Redis, Docker)

Github

- Benchmarked **18,000+ req/sec** under 100 concurrent connections (ApacheBench) and **88,000+ req/sec** sustained throughput over 30s (wrk), with **sub-6 ms** p95 latency.
- Implemented **Redis LRU cache** reducing DB hits by **70%**; leveraged Go goroutines for high-concurrency request handling with zero failed requests under load.

ACHIEVEMENTS

- Solved **500+** problems on LeetCode across various topics.
- Knight at LeetCode with a highest contest rating of **1950+**.

TECHNICAL SKILLS

- **Languages:** C++, Python, Go, TypeScript, Rust, C, D, Java, Bash
- **Frameworks and Libraries:** React.js, React Native, Next.js, SvelteKit, Express.js, Gin, FastAPI
- **Databases and ORMs:** PostgreSQL, MongoDB, Redis, SQLite, Prisma, Drizzle
- **Tools:** Linux, Docker, Kubernetes, Git, AWS, GCP
- **Concepts:** Distributed Systems, Concurrency, Multi-threading, System Design, CI/CD

EDUCATION

CV Raman Global University

Bachelor of Technology in Computer Science and Engineering

Bhubaneswar, India

(2023 – 2027) — CGPA: 8.47
